

You are planning to allow LPFM stations have priority over FM translators. Right now the most listen to station in my household is K-LOVE this is a breath of fresh air to my family and myself plus the local community. I am constantly seeing bumper stickers for K-LOVE when I drive around. Have you ever watch the BET and seenor heard the music videos, K-LOVE does not promote violence as many other station do with their programming. K-LOVE is a service that is in the public interest to provide wholesome values to our community. Beside the 1st amendment was written to keep the government from controlling my religious freedom. It was written to keep the government out of religion but not keep religion out of the government. By taken away these translators you are just adding to the moral decline of this once great nation of ours. Some where we must make a stand to help get this country back on track, this is one place where a government agency can start to do the right thing. Lets look for things that are Positive and Encouraging instead of someones greed and this is what this proposal is really about. One man's greed for something he has no control of. Thank You, Gary D. Adams concerned citizen.
